

Muhammad Dawood Ramzan

Software Engineer

Motivated and detail-oriented software engineering student with a strong foundation in programming, software development, and quality assurance. Passionate about building scalable web and mobile applications and ensuring software reliability through rigorous testing. Experienced in working with modern tech stacks and continuously seeking opportunities to enhance skills by tackling real-world problems. Adept at collaborating within teams to deliver secure, maintainable, and user-friendly solutions.

CONTACT

National University of Computer & Emerging Sciences(FAST) Faisalabad | 2021-2025

Bachelor's in Software Engineering

EDUCATION

- Key Learnings: OOP, SDLC, Data Structure, DataBase, Web/App Development, Software Testing.
- Bronze Medallist

PROJECTS

Final Year Project InnoVate

Collaboration Between Innovators & Investor

- **MERN** based Web Platform helps in collaboration between Innovators, Experts & Investors.
- Tested front-end and back-end modules using Jest, writing comprehensive unit and integration tests to ensure platform stability.
- Ensured secure transactions and data flow with JWT-based authentication and role-based access control
- Followed RESTful API principles for backend development, improving scalability and maintainability.
- Applied natural language processing techniques using cosine similarity to detect and prevent idea duplication or piracy.

Arabic Qaseeda

From script to screen — your Qaseeda library, managed seamlessly

- **Java** Application where we Apply CRUD operation on Hadith
- Developed a comprehensive suite of JUnit tests to rigorously check CRUD operations (insert, update, delete, fetch) ensuring database consistency and data integrity.
- Designed and implemented user-friendly GUI using Java Swing/JavaFX for smooth interaction and accessibility.

FundRaiser

- **MERN** Based Web Application for raising Funds.
- Allowed investors to browse projects and contribute funds securely through integrated payment gateways.

Vibe Live

- An **android** app providing the features like TikTok live
- Restructured legacy codebase to adopt MVVM architecture, improving code maintainability.
- Optimized app performance by reducing memory usage and improving load times, leading to a more responsive application.

Programming Languages & Frameworks

- Java, C++, Python, C#, JavaScript, TypeScript
- SQL, MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js, Express.js

SKILLS & EXPERIENCES

Testing & QA Tools:

- Jest, JUnit, Postman (API Testing), Manual Testing, Unit Testing, Integration Testing

Tools

- GitHub, Docker, Kubernetes, VS Code, Eclipse, Android Studio, Postman, Figma.

Databases & Backend

- Firebase, Oracle, MySQL, Node.js

ACHIEVEMENT & ACTIVITIES

International Collegiate Programming Contest (**ICPC**)

Fast Problem Solving Challenge(FPSC)
