EDUCATION

Bachelor's in Software Engineering | 2021-2025

National University Of Computer & Emerging Sciences (FAST) , Faisalabad

- **Key-Learnings** (CS): Object Oriented Programming, Data Structures, Database, Web/App-Development, Devops.
- **Key-Learnings** (SE): Software Architecture, Design, Development, Re-Engineering, Testing.

PROJECTS

Final Year Project – InnoVate

Protecting ideas, empowering innovation and fostering meaningful collaboration.

- Built a MERN stack web app connecting innovators with investors and experts.
- Enabled secure idea pitching, collaboration, and originality checks using NLP.
- Allowed experts to suggest and collaboratively refine ideas with innovators.

Emoji-Based Password Encryption System

Turn language into emotion — and encryption.

- Used polymorphic substitution and key-driven mapping for enhanced security.
- Integrated classical cryptography to obfuscate patterns and resist analysis.

Arabic Qaseeda

Cultural heritage, one CRUD at a time

- Java Application where we can apply CRUD operations on Books

Inventory Management System

Track smarter. Allocate faster. Manage better.

- C# Windows form application using Oracle

SKILLS & EXPERIENCE

Programming Languages: C/C++, Java, C#

Hands-on Experience: GitHub, VS Code, Eclipse, MongoDB, MySQL, Firebase, Postman, Express.js, Node.js.

Exposure To: Notion, Slack, Docker, Kubernetes, Azure.

Desing & Prototyping Tools: Figma, Wix

INTEREST

- Web/APP-Backend Development.
 - UI/UX Design
 - Software Engineering.
